

Coiled Air Sets

P/N: SB110L

Do you want...

- Real OE working length*
- 25% more flexibility at low temps
- 25% more resistance to abrasion
- 15% higher fitting pull off resistance
- 2 times quicker extension recovery

... Of course you do!
PBC Coiled Air Sets
are the answer!

- Working pressure 150psi within a -40° to +200°F temperature range
- Conforms to SAE J844 specifications

P/N	Description
NT11012S	12' COILED AIR SET
NT11015S	15' COILED AIR SET
NT11040S	15' COILED AIR SET WITH 40" LEAD

- Individual red and blue coils available
- Also available with brass handle option

***Warning – Many competitors are selling “short” coils but still referring to them as 12’ or 15’. The working length can be as much as 3’ shorter than PBC.**
