

# Inter-Vehicular Air Connection

P/N: SB120L

## Safety/Security

The air system connection between tractor and trailer is simple but critical to safety. The components need to be secure and the integrity of the air transmission needs to be perfect for good air system performance.

**PBC offers an assortment of components for a solid and safe inter-vehicular connection.**

1. NT11040S Coiled Air Set  
15' working length w/40" leads, other variations available.
2. RH21040C Chrome 40" Pogo Stick – RH21040 is zinc finish. Assorted hose clamps available.
3. RH15042 Gladhand/Plug Caddy  
Holds two gladhands and plugs. One plug model also available as are assorted dummy gladhands.
4. RH21620 Hose Tender Kit  
Other spring sizes available.
5. GH30000 Aluminum Coiled Air Grip Handles  
Also available in plastic – GH30001

6. GH11451 & GH11452 Nipple Mount Gladhands, other options available.  
GH11440 & GH11441 Bracket Mounted Gladhands, other options available including gladhand locks.

**PBC components are designed for durability & corrosion resistance to handle repeated hook-ups and the weather. But always replace worn components for safe, secure connections.**
