

WP-HD6545P

Product Improvement Announcement

PrimaTech is pleased to announce an important design improvement to the WP-HD6545P Detroit Diesel 60 Series New Water Pump. An enhancement has been made to the OE design, replacing the plastic backing plate with a steel backing plate. The steel backing plate provides longer life and durability as compared to its plastic counterpart that can warp and/or crack with age.

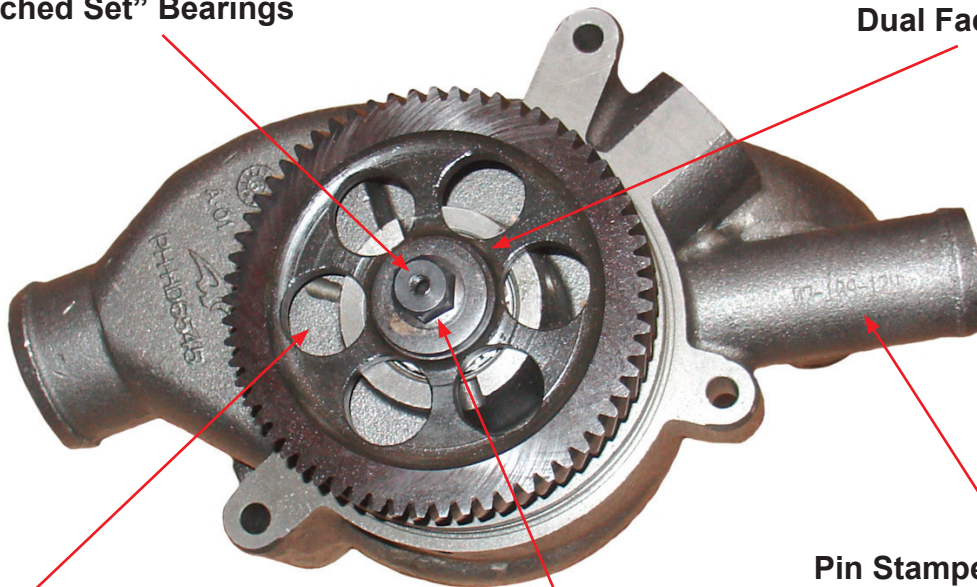

Steel Backing Plate

Additional Design Features:

Timken "Matched Set" Bearings

Silicon Carbide/Silicon Carbide
Dual Faced Seal

New Style with "Pocket"
Weep Chamber

OE Equivalent Bolt for
Backlash Measurement

Pin Stamped for Complete
