

Back-up lights are all about visibility and fleets are learning that Back-Up LEDs provide superior light output to incandescents. Along with the cab work light Back-Up LEDs greatly assist the drivers with trailer hook up. PrimaTronics offers both applications for standard tractor/trailers with high output Hi-Count LEDs for dual back-up light systems.

Why PrimaTronics LEDs?

- ◆ Superior light output for greater visibility
- ◆ 81% less amperage draw saves power for other systems
- ◆ Epoxy sealed circuit board for maximum protection from moisture and contamination
- ◆ Impact resistant polycarbonate lens for longer life
- ◆ Uses standard pigtailed so changeovers from incandescents are fast and easy
