

Many fleets prefer the option of using high count LEDs versus the lower count used by the OEMs because of cost. PrimaTronics has Hi-Count LED options in all five of the top applications and even with more diodes, Hi-Count LEDs draw significantly fewer amps than incandescent lamps. This leaves more power for other vehicle systems.

Model	Standard LED	Diodes	Hi-Count LED	Diodes
10	PTL1004A/R	4	PTL1013A/R	13
30	PTL3004A/R	4	PTL3009A/R	9
40	PTL4010A/R	10	PTL4040A/R	40
	PTL4018A/R	18	PTL4048A/R	48
40	PTL4019W	19	PTL4040W	40
60	PTL6010A/R	10	PTL6056A/R	56

Just a reminder, PrimaTronics LEDs use standard pigtailed so conversions from incandescent lamps are easy.
