

PrimaTronics Work Lamps are universal lamps used for several applications: back-up, fifth wheel spotting, forklift, off-road or general work area lighting. The three models are:

PTL5020 - 6 Diode LED

Features/Benefits

- Six, 1 watt high-output LEDs, total output of 600 lumens
- Whiter and brighter than incandescent and halogen for maximum visibility
- Less amperage drawn than incandescent, reserves more power for other vehicle needs
- Rectangular design projects long rectangular beam
- Vented powder coated cast aluminum body operates cooler and resists damage and corrosion
- Dual voltage

Specifications

- 12 or 24 Volt, 1.2 amp draw @ 12V
.6 amp draw @ 24V
- 4½" x 5⅞" x 1¾" deep
- Vented aluminum body
- 2 wire
- 5/16" mounting stud, stainless steel bracket

PT5021 - 5" Par 36

Specifications

- 12 volt, 2.43 amp draw
- Rubber housing absorbs shock
- 1 wire, grounds through mounting stud
- 5/16" mounting stud
- 4411 replacement bulb

PT5023 - 4" x 6" Halogen PT5024

Specifications

- 12 volt, 3.82 amp draw
- Plastic housing for corrosion resistance
- 1 wire, grounds through mounting stud
- H3-55 watt replacement halogen bulb
- PT5023 has flood pattern beam
- PT5024 has trapezoid pattern beam
